

# R. G. Miller Engineers: Exceeding your expectations

Headquartered in Houston, R. G. Miller Engineers, Inc. provides a full range of civil engineering services to both public and private sector clients in the Gulf Coast area. With their strong tradition of professionalism and skilled, experienced engineers, they work as an integrated team with their clients to ensure a successful outcome for every project.

Founded in 1966, their firm has grown significantly in both size and reputation in the past 40 years, and their engineers are recognized and respected throughout the state of Texas for their expertise. But their growth has not diminished their commitment to the values that have made them a trusted partner in hundreds of construction projects. They believe in doing things the right way – both technically and ethically. R. G. Miller has both the resources to provide needed expertise and the dedication to seeing that their clients get the attention they require. R. G. Miller's approach to management is

client-focused.

R. G. Miller brings a combination of experience, technology and strategy to deliver innovative solutions within your timeframe. They provide professional services for clients in municipalities, transportation, storm water management,

land development, utility districts and site development. Over the years, their staff has worked on many projects in Fort Bend, including subdivisions such as Lost Creek, Canyon Gate at the Brazos, Lakes of Williams Ranch and Fairpark Village, state and county roads, several municipal utility districts, and municipalities including the City of Missouri City, the City of Richmond and the Village of Pleak.

They can handle projects from conception through implementation, including feasibility studies, flood control and drainage systems, transportation planning and design, surveying, estimating, bidding, negotiation, and project and construction management.

R. G. Engineers welcomes the opportunity to demonstrate why they have achieved their current status as one of this area's premier civil engineering firms. Their goal is more than meeting your expectations; they want to exceed them.
