

Commitment to Sustainability

R. G. Miller Engineers, Inc. (RGME) provides professional engineering, environmental science, and sustainability consulting services to a range of clients. RGME is committed to helping clients plan, design, construct, and operate more sustainable projects in order to enhance their economic, social, and environmental performance.

RGME professionals will hold paramount the safety, health and welfare of the public. RGME professionals will seek to help clients apply economic, environmental, and social resources to enhance the safety, welfare, and quality of life for all of society, to achieve sustainable development.

RGME is a member of the Institute for Sustainable Infrastructure and employs three Envision Sustainability Professionals. RGME is a member of the West Houston Association's Sustainable Infrastructure Committee. RGME's *Stonebrook Estates* project was recognized for its sustainable design elements, including green stormwater management elements, when it was awarded the West Houston Association's Sustainability Stars Award.

When requested by our clients, RGME will assist in the preparation of a project sustainability management policy that defines the scope of the project and the project team's commitment to achieve clear economic, social, and environmental project objectives.

When requested by our clients, RGME will assist with checking project planning and design outcomes against the sustainability management policy and will identify project planning adjustments to enhance results.

When requested by our clients, RGME will assist with documentation of project meetings that include discussions about how project-specific sustainability objectives will be achieved.
